

GoQuant QA Assessment Report

Test Summary

This report summarizes the automated test results for the GoQuant Assessment project. All test scripts were executed using **Playwright**, with supporting API tests via **Postman**. Each module includes validation for login, account management, order execution, and API response integrity.

Test Execution Evidence

Each test case has its own individual **Playwright trace recording** uploaded to GitHub. These traces include full steps, network logs, screenshots, and console logs for debugging.

#	Test Case	Trace File	GitHub
	Login with		
01	Invalid Credentials	TC01_LoginInvalid_Creds.zip	View Trace (https://github.com/Darshana-BS/GQ_Assessment/blob/GQ_Assessment/tests/tr
